Brown University Talks in the Aftermath of December 13, 2025

"*Resiliency After*" (December 2025 through February 2026). As a part of the Ever True initiative, provided a series of educational sessions for the Brown community related to community and individual level responses to a mass violence shooting. Sessions incorporated principles of Psychological First Aid, were informed by experts in community level disaster responses, and were tailored to the unique experiences of Brown and Providence Rhode Island. Sessions were provided for faculty, staff, and students as well as for the larger community of student supports including alumni and family members. Over the course of December, January, and February, these sessions changed slightly as a function of context and attendees.

"*Resiliency After, Skills for Recovery Sessions*" (March 2026-May 2026). As a part of the Ever True initiative, organized a series of sessions, with topics informed by the Skills for Recovery framework, offered to Brown University students, faculty, and staff. Session topics included "*Navigating Fears, Worries, and Emotions*" presented by Nicole Nugent, "*Movement and Nutrition for Recovery*" presented by Jennifer Warnick, "*Finding Joy and Meaning*" presented by Audrey Tyrka, "*Restorative Sleep During Difficult Times*" presented by Nicole Nugent, "*Relaxation and Mindfulness*" presented by Micheline Anderson, and "*Social Support and Connection*" presented by Nicole Nugent.

"*Resiliency After, Fall Semester Sessions*" (https://evertrue.brown.edu/resource/resiliency-after-sessions). As part of the Brown Ever True Roadmap to Recovery, the Office of the President is offering "Resiliency After," a monthly and weekly series of educational sessions for Brown students, faculty and staff members focused on building resilience and strengthening community. The "Resiliency After" series is designed to provide practical, evidence-based strategies to help participants navigate stress, foster connection, and support well-being. Topics for the Fall 2026 semester — including community and connection, cultivating gratitude and hope, and more — align with a set of shared monthly themes across campus, informed by Skills for Psychological Recovery, research on resilience and flourishing, and Brown's unique culture and values. Sessions are matched both to the academic cadence as well as to research and experience related to the first year following a mass shooting event. As students returned to campus and new students joined, the session topic was "Community Connection." In October, a time during increased stressors on college campuses, the session topic was "Strategies for Moving Beyond the Stress." In November, as much of US culture focuses on gratitude and as the year mark approaches, the session topic was "Cultivating Gratitude and Hope." In December, during the year mark, the topic was "Remembrance and Finding Light and Purpose" to align with considerations that are on the minds of our campus community as we continue to grapple with the impact of the December 13th shooting.

Friends, Family, and Food: Interactive Virtual Environments for Children with Food Allergies
This project builds on our Phase I SBIR that developed interactive software for children with food allergies, focusing in issues of identifying symptoms, managing reactions, and responding to social pressures (bullying/teasing).
Role: Consultant

7. R01MH095786-01A1 Armey & Miller (MPI) 7/12/12 – 4/30/17
NIMH $1,725,867
Multi-method assessment of emotion reactivity: Translational research in suicide
This assessment-focused project proposes the development of a translational endophenotype using genetic, physiological, self-report, interview, and ecological momentary assessment measures to predict future suicidal ideation, behavior, and psychiatric hospitalizations.
Role: Co-Investigator

8. R01HD071982 Bradley (PI) 7/01/2013 – 5/31/2018
NICHD $2,080,866
Mechanisms of Intergenerational Impact of Maternal Trauma
The goal of this research is to examine the impact of childhood abuse across generations and the mechanisms of its trans-generational impact on offspring risk/resilience for stress-related psychological problems. This translational research will examine whether child stress/trauma exposure interacts with maternal child maltreatment history to predict the child risk markers. The proposed research will also address the lack of knowledge about potential mechanisms through which maternal child maltreatment may "transmit" risk to children.

NIMH $3,326,981
Biomarkers, social, and affective predictors of suicidal thoughts and behaviors in adolescents
This investigation examines adolescent *in vivo* emotion reactivity as related to social context in the real world during the high-risk post-discharge period. It is expected that early childhood maltreatment experiences will be associated with alterations in the methylation profile of genes involved in the major stress system and that these epigenetic changes will be associated with increased reactivity to social context in adolescents.
Role: PI

13. Supplement to R01MH105379 Nugent (PI) 09/01/2016 – 02/28/2017
NIMH $101,838
Biomarkers, social, and affective predictors of suicidal thoughts and behaviors in adolescents
This supplement supports the addition of extraction of social networking behaviors during the ecological sampling period of R01MH105379.
Role: PI

14. Child Health Innovation Institute McQuaid/Koinis Mitchell/Fritz (MPI) 2/1/16-1/31/22
Hassenfeld Child Health Institute
Childhood Asthma Research Innovation Program
The Childhood Asthma Research Innovation Program comprises three projects: 1) a project to capitalize the Child Health Innovation Institute birth cohort to assess genetic, epigenetic, and environmental/contextual contributions to asthma onset in children at, 2) examination of epigenetic, immune, and social context in school-aged children with asthma at risk for experiencing health disparities, and 3) establishment of data infrastructure and referral network to coordinate community-based interventions available across the state for families of children with asthma.

Social Media Use, Sleep, and Suicidality in Adolescents
This research examines the ways that late night online social messaging contributes to delays in sleep onset. Over time, delays in sleep onset in combination with inability to phase shift the wake time for adolescents, contributes to impairments in cognitive and emotional capacity for managing daily stress, resulting in overall vulnerability throughout the day as well as a shift of vulnerability to the evenings when research has shown increases in adolescent suicidal thoughts and behaviors. The present research longitudinal research will examine these processes in the real world using a combination of text extraction of online social messaging during the intensive sampling period, ecological momentary assessment, and wearable technology in combination with predictive algorithms.

UNIVERSITY/HOSPITAL TEACHING ROLES

Teaching Assistant, **Introduction to Psychology,** 1998
Department of Psychology, University of Colorado at Colorado Springs. Undergraduate, introductory self-paced course with 100 students; graded exams and provided individualized instruction.

Course Instructor, Princeton Review SAT, GRE, GMAT Preparatory Courses, 1999-2000
Princeton Review, Denver Area. High school SAT preparatory course with 12 students; carried out instruction, reviewed homework assignments, and led activities structured to improve student performance on the SAT. Also completed Princeton Review training to teach the GRE and GMAT.

Course Instructor, **Adolescent Psychology,** 2003
Department of Psychology, Kent State University. Junior-level undergraduate course with 140 students; independently developed and carried out curriculum including lectures, class discussion, multiple-choice exams, and a topical project.

Course Instructor, **Child Psychology**, 2004
Department of Psychology, Kent State University. Sophomore-level undergraduate course with 300 students. Independently developed and carried out curriculum including lectures, class discussion, multiple-choice exams, and supplemental reading materials.

Course Instructor, **Biopsychology**, 2006
Department of Psychology, Kent State University. Junior-level undergraduate course with 40 students. All aspects of the course were independently developed and carried out, including selection of course materials, development and provision of lectures, and creation of exams. Exams included multiple-choice, fill-in-the-blank, matching, and short answer items and incorporated an assessment of student knowledge of material from lecture, the textbook, and supplemental reading materials.

Course Instructor, Writing in Psychology*,* 2003, 2006
Department of Psychology, Kent State University. Junior-level undergraduate course with 5

students; developed and carried out curriculum tailored to improve student writing skills, critical thinking, and research abilities.

Teaching Assistant, **Genetics and Human Behavior,** 2009
Department of Psychology, Brown University
Summer Studies pre-college course for high school students interested in taking a college-level course. Assisted with course discussions, applied laboratory experiences, and graded course exams.

Clinical Supervisor, 2010-present
Department of Child and Adolescent Psychiatry, Pediatric Psychology Training Program.
Provide weekly (one-hour) clinical supervision of pediatric psychology postdoctoral fellow outpatient therapy.

Seminar Co-Director, Pediatric Psychology Seminar Series, 2010-2012
Department of Child and Adolescent Psychiatry, Pediatric Psychology Training Program.
Coordinate weekly seminars for pediatric psychology trainees during the academic year, with additional facilitation of continuing education opportunities for faculty.

Lecturer, Department of Psychiatry and Human Behavior Training Consortium, 2010-present
Alpert Brown Medical School. Provide 2-3 60- to 90-minute seminars to Brown psychology and psychiatry pre- and post-doctoral trainees related to *child posttraumatic stress disorder*, *refugee*/*immigrant mental health, grant writing, power analysis, and genetic research paradigms.*

Course Instructor, Psychology of Stress and Coping, 2011
Continuing Education, Psychology Department, Brown University
Non-credit 12-hour course provides an interactive overview of stress as both an environmental- and individual-level concept. Through lecture, discussions, projects and in class activities students gain an understanding of acute and chronic effects of stress/trauma, coping, and outcomes of stress/trauma. Finally, students are exposed to major empirically supported treatments for disorders of traumatic stress.

Course Instructor, Psychology of Stress and Trauma, 2011- present
Psychology Department, Brown University
Summer Studies pre-college course for high school students interested in taking a college-level course. This course provides an introduction to the field of traumatic stress. Through lecture, discussions, projects and in class activities students gain an understanding of how humans cope with trauma, what factors (i.e., aspects of the trauma, social support, personality and coping style, biology and genetics) predict who will have difficulty coping with trauma, and how we can treat trauma.

Course Instructor, Psychology of Resilience, 2015 – 2017; 2022
Continuing Education, Psychology Department, Brown University
Summer Studies pre-college course for high school students interested in taking a college-level course. This course introduces students to emerging literature on the psychology of resilience,

including a brief overview of the potentially deleterious effects of a range of adversity and trauma experiences (such as posttraumatic stress disorder or depression). The course describes resilience as understood through psychological, social, and biological evidence. Finally, we review current evidence and theory related to promotion of resilience at the level of individuals and/or communities.
