

Curriculum Vitae
January 2023

1. Fulvio Domini

Professor of Cognitive, Linguistic and Psychological Sciences
Dept. of Cognitive and Linguistic Sciences, Box 1978
Brown University
(401) 863-1356 wk, (401) 863-2255 FAX
Fulvio_Domini@brown.edu

2. Home Address:

242 Williams Street
Providence, RI 02906

3. Education:

Ph.D. 1997 University of Trieste, Italy, Experimental Psychology, “A new heuristic for the analysis of the optic flow”

M.S. 1991 University of Trieste, Italy, Electrical Engineering, “A stochastic approach for speech understanding”

4. Professional appointments:

2012-present Professor of Cognitive, Linguistic and Psychological Sciences, Brown University

2015–present Visiting Research Collaborator, Department of Psychology, Princeton University

2008–2017 Senior Scientist/Collaborator, Center for Neuroscience and Cognitive Systems, Italian Institute of Technology, Rovereto, Italy

2005–2012 Associate Professor of Cognitive and Linguistic Sciences, Brown University

1999 –2005 Assistant Professor of Cognitive and Linguistic Sciences, Brown University

1998-1999 Postdoctoral Researcher, School of Optometry, UC Berkeley.

1997-1998 Postdoctoral Researcher, Department of Cognitive Science, UC, Irvine

5. Completed Research

In the list that follows my name in **bold** indicates I was PI on the project.

(a) Chapters

1. **Domini**, F., & Caudek, C. (2011). Combining image signals before 3D reconstruction: The Intrinsic Constraint Model of cue integration. In In J. Trommershäuser, M. S., Landy, & K. Kording (Eds.), Sensory Cue Integration (pp. 120–143). New York: Oxford University Press.
2. **Domini**, F., & Caudek, C. (2013). Perception and Action Without Veridical Metric Reconstruction: An Affine Approach. In [S J. Dickinson Z. Pizlo](#) (Eds.). [Shape Perception in Human and Computer Vision](#) (pp. 285-298). Springer London.

(b) *Referred Journal Articles*

62. **Domini, F.** (2023). The case against probabilistic inference: a new deterministic theory of 3D visual processing. *Philosophical Transactions of the Royal Society B*, 378(1869), 20210458.

(d) *Invited Lectures (Conferences and Symposia)*

Domini F. (2001) Temporal Integration in Structure from Motion. Invited paper, *Eleventh International Conference on Perception and Action (ICPA XI.)* University of Connecticut, Storrs, CT..

Domini F. (2001) Perception of three-dimensional structure from motion: a new theory. Invited symposium paper, *European Conference on Visual Perception (ECVP)*, Kusadasy, Turkey.

Domini F. (2007) 3D-cue Integration: putting the pieces together. Symposium Organizer, *European Conference on Visual Perception (ECVP)*, Arezzo, Italy.

Domini F. (2008) Combining image signals *before* 3D reconstruction: The Intrinsic Constraint Model of cue integration. Invited workshop paper, *Rauischholzhausen Castle, Germany, Workshop “Cue combination – Unifying perceptual theory”*.

Domini F. (2012) 3D perception and action do not require veridical Euclidean reconstruction. Invited workshop paper, *Adaptive Computation*, Santorini 30th May – 3rd June 2012

Domini F. (2021) A novel non-probabilistic model of 3D cue integration explains both perception and action. Symposium organizer and speaker for “*New approaches to 3D vision*”, *The Royal Society of London*.

(e) *Invited Lectures (Colloquia and Talks)*

2001: University of Virginia; Eunice Kennedy Shriver Center (UM medical School), Harvard University.

2004: University of Pennsylvania; University of Virginia; New York University

2006: University of Virginia; University of Glasgow, UK.

2007: York University, Canada; University of Southwestern Ontario, Canada; University of Rochester; Boston University.

2010: Hamburg University, Germany; University of St. Andrews, UK.

2013: Department of Psychology, North Dakota State University

2017: Center for Neuroscience and Cognitive Systems, IIT, Rovereto, Italy

2018: Princeton University, Rutgers University, SVG2018 Scotland

2019: Ecole Normal Superior, Paris, France.

2021: Giessen University, Germany

6. Research Grants

(a) Current grants

“A test of a novel non-probabilistic model of 3D cue integration”, PI, NSF #BCS 2120610, 2021-2024, \$499,996 (direct + indirect)

“Encoding of probability distributions of 3D estimates in mind and brain”, PI, NIH 1R21EY033182-01A1, \$423,524 (direct + indirect)

(b) Completed grants

“The intertwined roles of vision and sensorimotor adaptation on reach-to-grasp movements”, PI, NSF #BCS 1827550, 2018-2021, \$ 523,550 (direct + indirect)

“Intrinsic Constraints: Local Affine Reconstruction from Multiple Image Signals”, PI, NSF #BCS 0643234, 2007-2012, \$350,000 (direct + indirect)

“A new approach to the problem of cue-integration for the perception of 3D shape”, PI, NSF #BCS 0345763, 2004-2006, \$87,821 (direct + indirect)

“Spatial and temporal integration in the perception of 3D Shape.” PI, NSF #BCS 0078441, 2000-2005, \$274,530 (direct + indirect)
