Publications

In the theoretical high energy community, the author list is usually **alphabetical**. All my papers, with a few exceptions, follow the rule of alphabetical author ordering. For all my publications and preprints since I became a professor in Sep. 2013, I mark the undergraduate student collaborators **red**, graduate student collaborators **blue** and postdocs **orange**. The status of a collaborator is determined by that when he/she participated in the project. My Inspire author identifier is [Jiji.Fan.1](#) (click it to go to my Inspire page for the most updated paper list and citation counts). One could also click on the journals and arxiv numbers in the list below to go to the corresponding webpages. The publications are ordered by their publication dates (instead of arxiv preprint dates), from the latest to the earliest.
