#### UNIVERSITY TEACHING ROLES

Course Co-Director, BIOL 3652 IMS II: Brain Sciences, The Warren Alpert Medical School of Brown University, Providence, RI, 2010-present

-I have designed and overseen curriculum for Brain Sciences, the core neuroscience course for first year Alpert Medical students. In addition to being an “overall” course co-director, I am also a co-director for the Neuropathophysiology portion of the course. This course runs for approximately 10 weeks and encompasses neuroanatomy, neurobiology, neuropharmacology, neuropathology/neuroimaging, neuropathophysiology, brain and behavior, and psychiatry.

-Since 2010 I have reinstated case-based learning through “small group” sessions, designed multimedia clinical cases to enhance learning, including interactive sessions with subsequent live patient presentation and panel discussion. I have recruited diverse faculty lecturers and small group leaders and design and host orientation sessions for new small group preceptors

-Starting in 2020-2021, in light of the COVID-19 pandemic, I designed and implemented new curricular activities to enhance the Brain Sciences course, including brief pre-recorded videos and modules to reduce total virtual lecture time, including an introduction to the neuro exam module, and added student directed learning and team-based learning activities to solve “mystery cases” in small groups, to improve student engagement and lifelong learning.

-I contribute additionally as a lecturer and individual small group leader, exam proctor, and I write test questions with attention to rationales and learning objectives.
