RICKERBY, MD (2016) *Greater than the Sum of its Parts: An Integrated, Patient and Family-Centered Approach for Adolescents with Med/Psych Presentations*. Rhode Island Medical Journal, 99, 21-23

**Teaching:**

This hiatus from clinical pediatrics gave me an invaluable opportunity to challenge myself in new ways intellectually and inspire a new generation of young women to appreciate and pursue science careers (some have already graduated from medical school) I loved being a teacher. The most precious opportunity of all however was the chance this break provided me to write about my experiences in healthcare and, in doing so, shift from being a disillusioned critic to becoming an advocate for change.

The decision to leave pediatrics when and how I did was ultimately what gave me the vision and enthusiasm to return.

- 9/2001- 8/2012      Science Department, Lincoln School, Providence RI  
                               Chemistry teacher, *responsible for both introductory and advanced laboratory courses in chemistry and physics*
