## **Works-In-Progress**

*Beyond Origin Stories: Democratic Faith and Its Burden* (Introduction, Chapters 1 and 2 complete; Final Chapter 3 in development)

**Abstract:** This book examines how American democratic life is governed by narratives of origin that seek moral clarity by anchoring political meaning in the nation's founding—whether through celebratory appeals to founding virtue or critical accounts of constitutive violence. The book argues that such origin stories deform democratic life not because the founding is irrelevant, but because treating it as destiny displaces responsibility from the present and narrows the space of democratic judgment. Against both pessimistic and romantic readings of the American founding, it advances an alternative orientation—democratic faith—understood as an ethical and spiritual commitment to freedom and equality as ongoing tasks rather than inherited achievements secured by founders, institutions, or outcomes. Drawing on American political thought and culminating in a reflection on Mamie Till-Mobley's public witness, the book shows how democratic faith sustains political agency amid domination, disappointment, and institutional failure through virtues such as courage, openness, perceptual sensitivity, and humility. The argument is not a rejection of the founding or of history, but a rethinking of how they should function in democratic life—without redemption, guarantees, or the surrender of the burden of freedom.

***Ethos and Evolution: W. E. B. Du Bois and the Making of Modern Political Thought (Early-Stage Book Project)***

**Abstract:** This book traces Du Bois's effort to understand how racial domination distorts both the cultural ethos of modern life and the democratic promise it claims to uphold. Resisting efforts to divide his work into discrete periods, it shows how Du Bois persistently asked two questions: What are the defining features of Black under modernity, and how do they interact with the institutional and moral life of the "West"? Through close readings of *The Souls of Black Folk* (1903), *Darkwater* (1920), and *Dusk of Dawn* (1940), the book reconstructs a continuous philosophical project—one that shifts from concern with political and cultural life of the United States to the global political economy while maintaining a singular concern with modernity's deformation of democracy life. Throughout, Du Bois remains preoccupied with the kinds of people we become.

***The Burden of Freedom: James Baldwin and the Turmoil of Modern Identity (Early-Stage Book Project)***

**Abstract:** This book explores James Baldwin's writings as a sustained meditation on the existential burden of freedom in modern American democratic life. Moving beyond standard treatments of Baldwin as a commentator on race and national identity, it argues that his work is animated by a deeper concern: how the human drive for security, mastery, and innocence leads to the formation of rigid identities that shield us from the anxiety of freedom, but in doing so, deform our moral and political lives. At the heart of Baldwin's thought is the claim that American liberal democracy rests on a spiritual and cultural evasion—a refusal to confront the tragic, uncertain, and unredeemed dimensions of freedom. Drawing on Baldwin's essays and fiction, and placing him in dialogue with figures such as Reinhold Niebuhr, Richard Wright, Albert Camus, and Toni Morrison, the book reconstructs Baldwin's vision of democratic life as an ethical and perceptual practice—requiring courage, love, and the willingness to see ourselves and others without illusions.
