Social Media Use, Sleep, and Suicidality in Adolescents

This research examines the ways that late night online social messaging contributes to delays in sleep onset. Over time, delays in sleep onset in combination with inability to phase shift the wake time for adolescents, contributes to impairments in cognitive and emotional capacity for managing daily stress, resulting in overall vulnerability throughout the day as well as a shift of vulnerability to the evenings when research has shown increases in adolescent suicidal thoughts and behaviors. The present research longitudinal research will examine these processes in the real world using a combination of text extraction of online social messaging during the intensive sampling period, ecological momentary assessment, and wearable technology in combination with predictive algorithms.

UNIVERSITY/HOSPITAL TEACHING ROLES

Teaching Assistant, Introduction to Psychology, 1998

Department of Psychology, University of Colorado at Colorado Springs. Undergraduate, introductory self-paced course with 100 students; graded exams and provided individualized instruction.

Course Instructor, Princeton Review SAT, GRE, GMAT Preparatory Courses, 1999-2000

Princeton Review, Denver Area. High school SAT preparatory course with 12 students; carried out instruction, reviewed homework assignments, and led activities structured to improve student performance on the SAT. Also completed Princeton Review training to teach the GRE and GMAT.

Course Instructor, Adolescent Psychology, 2003

Department of Psychology, Kent State University. Junior-level undergraduate course with 140 students; independently developed and carried out curriculum including lectures, class discussion, multiple-choice exams, and a topical project.

Course Instructor, Child Psychology, 2004

Department of Psychology, Kent State University. Sophomore-level undergraduate course with 300 students. Independently developed and carried out curriculum including lectures, class discussion, multiple-choice exams, and supplemental reading materials.

Course Instructor, Biopsychology, 2006

Department of Psychology, Kent State University. Junior-level undergraduate course with 40

students. All aspects of the course were independently developed and carried out, including selection of course materials, development and provision of lectures, and creation of exams. Exams included multiple-choice, fill-in-the-blank, matching, and short answer items and incorporated an assessment of student knowledge of material from lecture, the textbook, and supplemental reading materials.

Course Instructor, Writing in Psychology, 2003, 2006

Department of Psychology, Kent State University. Junior-level undergraduate course with 5 students; developed and carried out curriculum tailored to improve student writing skills, critical thinking, and research abilities.

Teaching Assistant, Genetics and Human Behavior, 2009

Department of Psychology, Brown University

Summer Studies pre-college course for high school students interested in taking a college-level course. Assisted with course discussions, applied laboratory experiences, and graded course exams.

Clinical Supervisor, 2010-present

Department of Child and Adolescent Psychiatry, Pediatric Psychology Training Program.

Provide weekly (one-hour) clinical supervision of pediatric psychology postdoctoral fellow outpatient therapy.

Seminar Co-Director, Pediatric Psychology Seminar Series, 2010-2012

Department of Child and Adolescent Psychiatry, Pediatric Psychology Training Program.

Coordinate weekly seminars for pediatric psychology trainees during the academic year, with additional facilitation of continuing education opportunities for faculty.

Lecturer, Department of Psychiatry and Human Behavior Training Consortium, 2010-present

Alpert Brown Medical School. Provide 2-3 60- to 90-minute seminars to Brown psychology and psychiatry pre- and post-doctoral trainees related to *child posttraumatic stress disorder, refugee/immigrant mental health, grant writing, power analysis, and genetic research paradigms.*

Course Instructor, Psychology of Stress and Coping, 2011

Continuing Education, Psychology Department, Brown University

Non-credit 12-hour course provides an interactive overview of stress as both an environmental- and individual-level concept. Through lecture, discussions, projects and in class activities students gain an understanding of acute and chronic effects of stress/trauma, coping, and outcomes of stress/trauma. Finally, students are exposed to major empirically supported treatments for disorders of traumatic stress.

Course Instructor, Psychology of Stress and Trauma, 2011- present

Psychology Department, Brown University

Summer Studies pre-college course for high school students interested in taking a college-level course. This course provides an introduction to the field of traumatic stress. Through lecture, discussions, projects and in class activities students gain an understanding of how humans cope

with trauma, what factors (i.e., aspects of the trauma, social support, personality and coping style, biology and genetics) predict who will have difficulty coping with trauma, and how we can treat trauma.

Course Instructor, Psychology of Resilience, 2015 – 2017; 2022

Continuing Education, Psychology Department, Brown University

Summer Studies pre-college course for high school students interested in taking a college-level course. This course introduces students to emerging literature on the psychology of resilience, including a brief overview of the potentially deleterious effects of a range of adversity and trauma experiences (such as posttraumatic stress disorder or depression). The course describes resilience as understood through psychological, social, and biological evidence. Finally, we review current evidence and theory related to promotion of resilience at the level of individuals and/or communities.
