RESEARCH GRANTS – Current

1. Principal Investigator (Contact MPI)
Advancing resources for systematic reviews and meta-analyses of complementary and integrative health interventions
 Type: R24 (AT012845)
 Sponsor: NCCIH/NIH
 Grant aims to create an open-access data repository of mindfulness and integrative health randomized controlled trials for evidence synthesis with input from key stakeholders, along with pilot awards and educational resources for scientists in the field.
 Period: 04/2024 –03/2029
 Total amount: \$3,036,691
2. Principal Investigator
Addressing the public mental health crisis among displaced Ukrainians
 Type: Brown-Ukraine Public Health Exchange Endowment Fund
 Sponsor: Brown University School of Public Health
 Grant aims to foster collaborative relationships with local investigators and organizations at Ukraine to understand and address the mental health needs of displaced Ukrainians affected by the Russian invasion, with an emphasis of developing mindfulness interventions responsive to experiences of war, violence, grief, and displacement. Two pilot projects are ongoing, including (a) developing mindfulness program for displaced adolescents in Germany; and (b) addressing the needs of internally displaced adult patients on MOUD treatment in methadone clinics within Ukraine.
 Total amount: \$50,000
3. Principal Investigator (Contact MPI)
Engaging youth, caregivers, and teachers for suicide prevention: Developing and implementing a multi-level intervention in rural China
 Type: R34 (MH136243)
 Sponsor: NIMH/NIH
 Grant aims to develop and pilot test a stigma-reduction focused, school-to-family based suicide prevention program including mindfulness and other socioemotional learning through community-

engaged research and engaging adolescents, caregivers, and teachers in rural China, where suicide has been the #1 leading cause of death among young people.

Period: 07/2024 – 06/2027

Total amount: \$621,655

4. Principal Investigator (Contact MPI)

Engaging transgender women in HIV prevention and health promotion through a stigma-reduction intervention

Type: R01 (TW012677)

Sponsor: Fogarty International Center/NIH

Grant aims to develop and test a mobile-health based, stigma reduction and acceptance focused, peer-delivered gender affirmation intervention for Chinese transfeminine women and engage them in HIV prevention via promoting mental and sexual health. This research will evaluate gender affirmative care as an HIV prevention strategy for this key population in the region.

Period: 08/2024 – 07/2027

Total amount: \$597,938

5. Principal Investigator

Developing internet-delivered, mindfulness-based intervention to reduce HIV risk and promote mental and sexual health among young adult MSM

Type: K23 (AT011173)

Sponsor: NIH/National Center for Complementary and Integrative Health (NCCIH)

PI on a research project for five years to systematically adapt Mindfulness-based Stress Reduction (MBSR) both in content (targeting minority stress) and delivery (e-health) as a novel HIV strategy targeting bio-psychosocial outcomes among young adult sexual minority men, followed by a feasibility RCT trial.

Period: 09/2020 – 09/2025

Total amount: \$841,850

6. Principal Investigator

Developing internet-delivered, mindfulness-based intervention to reduce HIV risk and promote mental and sexual health among young adult MSM

Type: Administrative Supplement Award (3K23AT011173-03S1)

Sponsor: The NIH Office of Disease Prevention (ODP)

This administrative supplement has the goal of advancing HIV prevention intervention with populations that experience health disparities, specifically by incorporating STI self-testing into existing protocol and recruiting additional participants who are Black/Latino young adult sexual minority men to the randomized controlled trial.

Period: 01/01/2023 – 12/31/2025

Total amount: \$168,370

7. Principal Investigator (Contact MPI)

HIV risk reduction intervention for trans women with intimate partner victimization

Type: R34 (MH119968)

Sponsor: NIH/National Institute of Mental Health (NIMH)

This project aims to develop and pilot test a primary HIV prevention intervention to address the interconnected risks of HIV and intimate partner victimization among transgender women.

Period: 06/2022 – 05/2024

Total amount: \$488,804

8. Principal Investigator

Developing and testing an internet-based mindfulness intervention for women diagnosed with gestational diabetes mellitus

Type: Varela Research Grant

Sponsor: Mind & Life Institute

This project aims to develop and test a tailored, mindfulness-based intervention to improve emotional well-being, glycemic regulation, and maternal and fetal health outcomes among women with gestational diabetes.

Period: 01/2022 – 09/2025

Total amount: \$20,000

9. co-Investigator (PI: Loucks)

Mindfulness-based stress reduction: An implementation science-informed systematic review and meta-analysis

Type: R01 (R01AT011745)

Sponsor: NIH/National Center for Complementary and Integrative Health (NCCIH)

This project aims to conduct a systematic review and meta-analysis of the effectiveness of MBSR on a range of health-related outcomes in order to fill gaps in evidence syntheses that are essential for policy decision making related to MBSR in various medical and non-medical settings across populations.

Period: 06/2022 – 05/2027

Total amount: \$2,876,905

10. co-Investigator (PI: Operario)

Stigma reduction and gender affirmation to promote HIV prevention/testing in trans women

Type: R21 (TW012010)

Sponsor: NIH/National Institute of Mental Health (NIMH)

This project aims to develop and test a gender-affirmative HIV prevention intervention to promote HIV self-testing, linkage to HIV prevention and care services, behavioral risk reduction, and service engagement among transgender women in the Philippines.

Period: 08/2021 – 07/2024

Total amount: \$372,584

11. co-Investigator (PI: Operario)

Promoting HIV testing among Chinese MSM via app-based mobile health

Type: R01 (MH123352)

Sponsor: NIH/National Institute of Mental Health (NIMH)

The major goal of this project is to improve the science and implementation of app-based mobile health approaches to optimize HIV testing and linkage to care as part of a single intervention continuum with MSM in China.

Period: 04/15/2020 – 04/15/2025

Total amount: \$2,851,955

RESEARCH GRANTS – Under review (PI grants only)

- 1 Principal Investigator
Promoting optimal maternal and fetal health outcomes among people with gestational diabetes mellitus via mindfulness
 Type: R34
 Sponsor: NCCIH/NIH
 Grant aims to test a mindfulness-based mHealth program to address stigma, enhance emotional well-being, promote glucose regulation, and reduce risk for type 2 diabetes among people newly diagnosed with gestational diabetes
Grant submitted June 2024

RESEARCH GRANTS – Completed

1. co-Investigator (PI: Pachankis)
Developing efficient intervention technologies to reduce stigma-related stress, mental health problems, and HIV risk among young Chinese MSM
 Type: R21 (TW011762-01)
 Sponsor: NIH/National Institute of Mental Health (NIMH)
 Grant aims to develop and test a digitalized psychotherapy intervention for distressed sexual minority men in China to lower mental health symptoms and HIV risk.
 Period: 08/2020 – 08/2022
 Total amount: \$380,606
2. Principal Investigator
Testing a mobile mindfulness intervention to address the burden of obesity among mid-age sexual minority women affected by early life adversities
 Type: Reversibility Network pilot funding
 Sponsor: NIH/National Institute of Aging (NIA)
 The aim of this grant is to examine the acceptability and preliminary efficacy of an app-based mindfulness intervention for overweight (BMI > 25) midlife sexual minority women (lesbian, bisexual, and queer women) affected by psychosocial forms of early life adversity, as well as to understand the potential mechanisms of mindfulness to address mental and behavioral health outcomes affected by early life adversities.
 Period: 10/2021- 05/2022

Total amount: \$15,000

3. Principal Investigator (Contact MPI)

Exploring a Mindfulness-based Approaches to Promote Mental and Sexual Health in Young MSM

Type: Catalyst Award

Sponsor: Brown University School of Public Health

Through quantitative (n = 400) and qualitative (n = 15) data collection, the study aims to test a minority stress and self-regulation informed theory to explore the utility of mindfulness and self-compassion informed approaches for mental and sexual health promotion among young gay, bisexual and queer men.

Period: 09/2020 – 06/2022

Total amount: \$20,000

4. co-Investigator (PI: Loucks)

Extending interdisciplinary research network on interventions to reverse effects of early life adversity

Type: R24 (AG065174)

Sponsor: NIH/National Institute on Aging (NIA)

The aim of this training grant is to extend an interdisciplinary, international Research Network on Interventions to Reverse Effects of Early Life Adversity (aka “Reversibility Network”) through funding pilot research, organizing pre-conference workshops, and develop ELA measures toolkit.

Period: 04/2020 – 12/2021

Total amount: \$420,804

5. Fellow (PI: Brown)

Postdoctoral training in adolescent/young adult biobehavioral HIV research

Type: T32 MH078788

Sponsor: NIH/National Institute of Mental Health (NIMH)

The aim of this training grant is to facilitate Ph.D. and M.D. fellows to develop methodological skills to carry out independent research in areas of HIV prevention and treatment, sexually transmitted infections, substance abuse, and international health.

Period: 08/2018 – 8/2020

6. Principal Investigator

HIV testing, risk behaviors, and sexual and mental health among Chinese men who have sex with men (MSM): An examination based on the minority stress model

Type: Global Health Institute Research Award

Sponsor: University of Wisconsin-Madison

The aim of this grant is to examine the relevance of the minority stress theory to understand the mental and behavioral health among Chinese men who have sex with men, as well as to contextualize this theory to this population through quantitative (n > 900) and qualitative (n = 24) research methods.

Period: 8/2016 – 8/2018

Total amount: \$5,000
