RESEARCH GRANTS:

A: CURRENT GRANTS

2019-2024	Co-Principal Investigator. NIA P01AG027296 (MPIs: Mor & Trivedi). Alzheimer's Disease and Related Disorders Treatment and Outcomes in America: Changing Policies and Systems. This Program Project proposal seeks to understand how the high-need ADRD patients at various stages of disease progression fare under alternative payment and regulatory structures. The project proposes to study the effects of Medicare policy changes on the care and outcomes experienced by persons with ADRD who interface with home health, skilled nursing, and long-term NH Care. The four projects and three cores all focus on the effects of national Medicare payment and quality regulation policies on the outcomes experienced by persons with ADRD.
2019-2024	Co-Principal Investigator. NIA U54AG063546 (MPIs: Mor & Mitchell) NIA AD/ADRD Health Care Systems Research Collaboratory. The NIA AD/ADRD Collaboratory will provide the national infrastructure necessary to catalyze and support embedded pragmatic clinical trials of non-pharmacological interventions for persons with dementia. By convening national experts to provide consultation and guidance to Collaboratory-funded pilot projects and NIA-funded trials, the Collaboratory has the potential to transform care delivery, quality, and outcomes for millions of Americans suffering with AD/ADRD.
2020-2021	Co-Principal Investigator. NIA 3U54AG063546-02S1 (MPIs: Mor & Mitchell) (PI: McCreedy) IMPACT SUPPLEMENT: Effect of a COVID-specific advance care planning intervention on documentation of advance directives and goals of care. The goal of the IMPACT Collaboratory is to accelerate the translation of research for people with dementia through embedded pragmatic research. This supplement responds to the time urgency of the pandemic emergency. If successful, collaborating with the National Center for Excellence in Assisted Living (CEAL), we can quickly disseminate such effective interventions that can improve the quality of care at the end of life for ALC residents with dementia. Findings will be immediately useful to other physician groups reexamining advance directive orders for ALC residents during the pandemic.
2020-2021	Co-Principal Investigator. NIA 3U54AG063546-02S4 (MPIs: Mor & Mitchell) (PI: Chodosh) IMPACT SUPPLEMENT: COVID-19 Serologic Strategies for Skilled Nursing Facilities. We anticipate that this pilot study will set the stage for a larger trial that will ultimately set evidence-based policy for SNF staff-resident assignments that minimize risk of acquiring COVID-19, and directly improve the care of millions of Americans with ADRD.
2020-2021	Co-Principal Investigator. NIA 3U54AG063546-02S3 (MPIs: Mor & Mitchell) (PI: Lipsitz) IMPACT SUPPLEMENT: Evaluation of a State-wide Effort to Improve COVID-19 Infection Control in Massachusetts Nursing Homes. This project will lay the groundwork for future clinical trials in other states and health care networks, and will hopefully lead to the widespread dissemination of effective infection control practices in our nation's nursing homes.

2020-2022	Co-Principal Investigator. NIA 3U54AG063546-02S2 (MPIs: Mor & Mitchell) (PI: Berry) IMPACT SUPPLEMENT: Improved Testing for COVID-19 in Skilled Nursing Facilities: IMPACT-C. There is an urgent need to develop equitable, compassionate strategies to test SNF residents and healthcare workers for the SARS-CoV-2 virus. This proposal will leverage the foundation of the NIA Imbedded Pragmatic AD/ADRD Clinical Trials (IMPACT) Collaboratory to establish IMPACT-COVID-19 (IMPACT-C), a collaborative dedicated to developing and evaluating SARS-CoV-2 testing strategies in highly vulnerable SNF residents and workers. IMPACT-C will assemble the organizational, administrative, and expertise components necessary to swiftly conduct a rigorous vaccine trial, when available.
2020-2021	Principal Investigator. NIA 3U54AG063546-02S5 (MPIs: Mor & Mitchell) (PI: Mor) IMPACT SUPPLEMENT: Designing a Real Time COVID-19 vaccination Adverse Event Monitoring System for Nursing Home residents. SARS-CoV-2 has devastated US nursing homes, killing a high proportion of this vulnerable population. Once a vaccine has been approved, current plans are to administer to all nursing home residents quickly. We propose building and testing a real time Adverse Events monitoring system using electronic medical records updated daily from a large national nursing home chain that will be able to serve as an early warning system of unanticipated adverse effects of receiving a SARS-CoV-2 vaccine.
2021-2022	Principal Investigator. NIA 3U54AG063546-02S7 (MPIs: Mor & Mitchell) (PI: Mor: CVS) IMPACT SUPPLEMENT: Monitoring Medicare Beneficiaries' Response to COVID vaccines. This project will create a quasi "real time" data base that can be used to monitor the rates of adverse events of the SARS-CoV-2 vaccine in the frail, elderly and demented populations, few of whom were included in the phase 3 vaccine trials. The resulting data base and proposed analyses will provide the basis for assessing mid to long term safety and efficacy of the different vaccines being distributed for use in the elderly population in the country.
2021-2024	Principal Investigator. NIA 3U54AG063546-02S6 (MPIs: Mor & Mitchell) (PI: Mor: AHCA) IMPACT SUPPLEMENT: IMPACT Nursing Home Data Sharing Cooperative. In order to enhance providers', researchers' and policy makers' ability to track the incidence, morbidity and mortality of COVID among selected sub-groups of nursing home residents such as those with ADRD and those who are racial and ethnic minorities, this project will build an integrated electronic medical record-based data infrastructure for some 10,000 skilled nursing facilities serving hundreds of thousands of residents in order to track the impact of the current pandemic and future similar phenomenon.
2019-2024	Other Significant Contributor. NIA K01AG057822 (PI: Rivera-Hernandez) Medicare Advantage Plan Choice and Selection among Racial and Ethnic Minorities and Low-Income Seniors. The objective of this K01 is to assess dynamics of decision-making into MA among high-need seniors with various degrees of cognitive impairment using a mixed methods approach.
2017-2022	Principal Investigator. NIA R33AG057451. METRICaL – Music & Memory: a Pragmatic Trial for Nursing Home Residents with Alzheimer's Disease. This study will test the effect of a personalized music intervention (Music & Memory) to reduce agitated and aggressive behaviors among nursing home

	residents with moderate to severe dementia during a four-year R33 pragmatic trial.
2020-2022	Mentor. AHRQ R36AG068199 (PI: Fashaw) Disparities in Access to High-Quality Home Health and the Impact of Public Reporting. The overall objective of this application, is to use national administrative datasets (e.g., standardized HH patient assessment data) to analyze differences in access to high-quality HH care for vulnerable older adults and to understand if and how public reporting influences patients' access to high-quality services.
2021	Mentor. AHRQ R36 (PI: Bosco) Use and Outcomes of Opioid and Non-opioid Analgesics Following Total Hip and Knee Arthroplasty in Older Adults. The long term goal is to inform efforts to reduce opioid-related harms experienced by older adults, particularly those at risk of exposure to opioids through necessary medical care.
2016-2022	Principal Investigator. Insight Therapeutics. Stratified Cluster Random Assignment Trial FluAd. Brown University will provide all methodological, measurement design and statistical analysis associated with the proposed stratified, cluster random assignment trial of high dose flu vaccine in the nursing home setting.
2015-2021	Mentor. Foundation for Physical Therapy (Resnik). Center of Excellence in Physical Therapy, Health Services and Health Policy Research and Training Multi-Institutional Center on Health Services Training and Research: CoHSTAR. The goals of the COE PT HS/PT are to train highly skilled, physical therapist health services/health policy researchers. To mentor young and established researchers in HSR methods and grantsmanship, and to support meritorious preliminary studies that lead to external funding and scholarship.
2014-2021	Principal Investigator. NIH Common Fund (National Institute on Aging oversight; UH3AG049619-02) PROVEN: PRagmatic trial Of Video Education in Nursing homes. NHs serve the most frail and vulnerable patients. Interventions to deliver more patient-focused, cost-effective care in this setting are needed. Better advanced care planning offers an opportunity to improve NH care. Video decision support is a practical and innovative approach to uniformly provide advanced care planning. This work has the potential improve the care provided to millions of older Americans in NHs and enable future pragmatic trials in this setting.
2018-2021	IIR 17-231 (Mor-Site PI) Are Veteran's Outcomes Better when VA Purchases High-Quality Nursing Home Care? The objective is to characterize variation in CNH quality as it relates to VAMC characteristics, Veteran outcomes, and contracting practices.
2004-2022	Mentor. Aging Health & Health Services Research Training. 2T32 AG023482-14 (PI: Mor). This training grant proposal seeks to support the training of pre-doctoral trainees in Epidemiology, Health Services Research and Biostatistics with a focus on Aging and Health Services in order to meet the growing demand for investigators conducting research on the biological, psychological and social forces that shape the manner in which older Americans utilize health services.

1986-2023 Mentor. 5T32 HS000011-33 (PI: Trivedi). AHRQ National Research Service Award. Major changes in health care policy and delivery system reform make it essential to have well trained researchers operating in academic, government and private sector settings who understand the factors shaping these trends and who have the skill to evaluate their impact and design alternative approaches.

B: COMPLETED GRANTS

2017-2020 Principal Investigator. Department of Veteran's Affairs, HSR&D. The Effect of Reduction and Standardization of Reimbursements in VA Fee-Basis Program: Impact on Quality of Care and Health Outcomes. This project will investigate the impact of recent changes in VA policy towards reimbursing non-VA dialysis facilities that treat Veterans. It is unknown whether the payment changes have led to unintended and adverse consequences to Veterans' health outcomes thereby increasing hospitalizations and consequently VA expenditures. This work is expected to provide direct evidence on whether the payment policy changes have helped the VA both reduce costs without adversely impacting health outcomes.

2018-2019 Mentor. AHRQ 1R36HS026447-01(PI: Kosar) Financial Desirability of Nursing Home Patients: Do Low Levels of Medicare Reimbursement Limit Access to High-Quality Post-Acute Care and Impact Outcomes? The objective of this study is to examine whether current Medicare payment policies, which distinguish patients going to nursing homes (NHs) based on the amount of Skilled Nursing Facility (SNF) revenue they are expected to generate, create barriers to admission to high quality NHs for post-acute patients. Based on recent qualitative evidence showing that high-quality NHs increasingly solicit referrals for the most lucrative post-acute care patients, this study uses a novel strategy to emulate the process of screening patients according to the level of anticipated SNF reimbursement.

2018-2019 Mentor. AHRQ 1R36HS026440-01 (PI: Schwartz). How do I Choose? Home Health Agency Star Ratings and Their Impact on Selection and Outcomes The long-term goal of this research is to develop meaningful measures of home health (HH) quality that patients, families, and referring clinicians can use to make informed decisions about HH care. The immediate objective of this application, is to understand and compare the impact and effectiveness of the publicly reported quality and patient experience star ratings for HHAs.

2019-2020 Mentor. AHRQ R36HS027051 (PI: Meyers) How well does the Medicare Advantage 5-star ratings system capture enrollee outcomes and experiences? Our long term goal is to identify policy strategies to improve the performance of MA in addressing enrollee needs. Our immediate objective is to better understand the relationship between the MA 5-star rating system and the outcomes beneficiaries experience.

2019-2020 Mentor. AHRQ R36HS027054 (PI: Loomer) The Impact of the Medicare Home Health Rural Add-on payment on Beneficiary Access and Health Outcomes. Our long-term goal is to understand how Medicare can best incentivize the provision of high-quality health care for rural beneficiaries. The first step to achieving this goal and the overall objective of this study is to examine whether the rural payment add-on increases HH utilization and improves outcomes at the patient-level.

2018-2020	Co-Investigator. NIA R01AG057746-01 (Thomas). Do State Regulations Affect the Outcomes of Assisted Living Residents with Dementia. This research will provide critical information as states seek the most effective ways to regulate assisted living communities to ensure optimal outcomes for the growing population of residents with Alzheimer's disease-related dementias (ADRD) needing long-term care in these settings. This research is aligned with NIA's goal to improve the health and well-being of older people and will accelerate progress on meeting Goal 2 of the National Plan to Address Alzheimer's Disease to "enhance care quality and efficiency" for people with ADRD.
2018-2020	Co-Investigator. NIH R03 (PI: Rivera-Hernandez). Nursing Home Care Disparities for Hispanic Medicare Advantage and Fee-For-Service Beneficiaries with Alzheimers and Related Dementias The objective of this R03, the next step in this agenda, is to assess disparities among Hispanics in the quality of ADRD care in a national sample of Medicare enrollees in fee-for-service and MA plans. The long-term goal of our research is to improve the quality of care among vulnerable groups in the Medicare program, and reduce disparities among Hispanic and African-American beneficiaries.
2018	Co-Investigator. Sub to Allergan (Sub PI: Baier). Ironwood Pharma. Improving Safety of Transitions to Skilled Nursing Care Using Video-conferencing. Brown University's Center for Long-Term Care Quality & Innovation (Q&I Center) will conduct a three-part, cross-sectional study to describe the current treatment of chronic constipation among long-term care residents, assess its impact on resident quality of life, and estimate its costs.
2018-2019	Co-Investigator. NIA 3R01AG054656-02S1 Administrative Supplement (PI: Gozalo) Which Post-Acute Care Setting is Best for Patients' Outcomes? Post-acute care is widely used and costly. While patients have options for PAC services between different post-acute settings, there is little information on how these alternative post-acute care settings impact outcomes for different patient groups. ADRD patients are a particularly vulnerable group with different PAC needs and at higher risk of long-term institutionalization. The results of our study will help inform the referral of patients in need of PAC, and help guide policy aimed at improving PAC patient outcomes.
2018-2020	Co-Investigator. NIA R21AG059120 (Co-PIs: Thomas, Gutman) Innovative Approaches to Examine Post-Acute Care Outcomes of Older Adults with Traumatic Brain Injury. Our long-term goal is to improve the outcomes and lower the healthcare costs of older patients with TBI. The objective of this application, which is the next step toward attainment of our long-term goal, is to determine the predictors of outcomes, particularly functional and cognitive improvement and the ability to return home, among older adult patients with TBI.
2018-2020	Co-Investigator. Sub to Insight Therapeutics-Seqirus (PI: Gravenstein) Adjuvanted Influenza Vaccination and Morbidity and Mortality in U.S. Nursing Homes: Assessment of Vaccine Selection and Outcomes for the Follow-on Study Year. Brown University will provide all methodological, measurement design and statistical analysis associated with the proposed stratified, cluster random assignment trial of flu vaccine in the nursing home setting.
2018-2019	Sub Principal Investigator. 3U24AT009676-02S1 (PI: Hernandez) Sub to Duke Clinical Research Institute. NIH Health Care Systems Research Collaboratory

Coordinating Center – Alzheimer’s Supplement. Using the NIH Collaboratory Distributed Research Network to Identify and Characterize ADRD patients. The Electronic Health Records (EHR) Core of the NIH Collaboratory established the Distributed Research Network (DRN) to enable investigators to use of electronic health data acquired through large community-based health systems to facilitate the conduct of PCTs. The goal of this administrative supplement is to conduct the foundational work needed to establish the methods to identify and characterize patients with AD/ADRD cared for in multiple large health care systems.

- 2017-2020 Principal Investigator. Sanofi Infection in LTCF Study. The Burden of Infections in Long-Term Care Facilities Identification, Treatment, and Health Outcomes. The Brown Uni. team will assemble a comprehensive longitudinal database or series of sub-databases that serve as the basis for future studies related to infections in the LTC setting. More importantly, this database will provide important insights into a number of high-priority areas where medication utilization can be improved or the development of new drug products could be justified.
- 2017-2020 Co-Investigator. NIA R01 AG054656-01 (Co-PIs: Gozalo, Grabowski). Which Post-Acute Care Setting is Best for Patients' Outcomes? The overarching goal is to examine PAC utilization and patient outcomes across different conditions and PAC settings to address important gaps in knowledge that hinder the design of current policy efforts undertaken under the Affordable Care Act (ACA) like episode-based bundling of payments and the creation of Accountable Care Organizations, aimed at improving the value of post-acute care.
- 2017-2018 Mentor. NIGMS (PI: Thomas). Merging National Hospital Trauma Registry Data with Medicare Claims. The objective of this study is to merge multiple sources of data to examine predictors of successful outcomes, particularly the ability to return home following post-acute (PAC) rehabilitative care, among older patients age 65+ years with TBI.
- 2017-2021 Co-Principal Investigator. NIA R01AG053934-01A1 (PI: Mor, Wetle). Caregivers' Reactions and Experience: Imaging Dementia Evidence for Amyloid Scanning CARE IDEAS. Our study will combine survey data, Medicare claims data, and IDEAS study data to examine how results from amyloid PET scans impact care seeking behavior, planning for the future, emotional well-being, and economic security of both the care partner and cognitively impaired patients.
- 2017-2019 Principal Investigator. The Peterson Foundation. High-Cost, High-Needs Patient Project. The objective is to identify effective strategies to improve care delivery and reduce cost for the growing population of high-cost, high-need Medicare patients. There is widespread consensus that high-cost, high-need patients are those who either already account for a high proportion of costs or are at risk of incurring high costs.
- 2005-2019 Principal Investigator. NIA 5 P01 AG027296-07. Changing Long Term Care in America: Policies, Markets, Strategies, and Outcomes. Program Project grant proposes to study the effects of Medicare policy changes on the use of and outcomes Medicare’s post-acute care benefit and how those policies interact with long term care provider markets and states’ Medicaid policies.

2014-2019	Steering Committee Member. AHRQ 1R25HS023299-03 (PI: Schmid). Innovative Training to Improve CER PCOR Systematic Review Production and Uptake. The purpose of this project is to develop an innovative program to teach CER/PCOR methods focused on systematic review, along with cutting-edge computational and information technology focused on producing, interpreting, and utilizing evidence about best healthcare practices, using a combination of didactic, asynchronous, peer, and experiential methods.
2017-2019	Co-Investigator. NIA 5R03AG054687-02 (PI: Rahman). Rural-Urban Disparity in Post-Acute Care. The goal of this proposed research is to examine the rural-urban disparity in the prevalence and incidence of an ADRD diagnosis and Medicare beneficiaries' subsequent health outcomes. Our results will help policy development and improve care practice to reduce the rural-urban disparity.
2018-2019	Co-Investigator. Ironwood Pharma (PI: Baier). Constipation and Laxative Use Exploration (CLUE) in Nursing Homes. Analysis of over-the-counter laxative use.
2014-2019	PI of subcontract. National Health and Aging Trends Study. John Hopkins University. 2U01AG032947 NIA. The objective of this proposal is to design and conduct a longitudinal and national-representative study of disability trends and dynamics among the U.S. older population.
2014-2019	Co-Investigator of Hebrew Senior Life sub-contract from NIA Grant # 1R01AG045441). "A Clinical Prediction Tool to Guide Treatment of Osteoporosis in the Nursing Home". Brown will provide expertise in pharmacoepidemiology and advise the investigators on the use of the linked Medicare database of long-stay residents.
2017-2018	Principal Investigator Program Director. NIA P01 Core A-Administrative Supplement. Changing Long Term Care in America: Policies, Markets, Strategies, and Outcomes. Program Project grant proposes to study the effects of Medicare policy changes on the use of and outcomes Medicare's post-acute care benefit and how those policies interact with long term care provider markets and states' Medicaid policies.
2014-2018	Principal Investigator. NIA 5 R01 AG047180-02. Emerging Role of Medicare Advantage in Nursing Home Care. The long-term objective of this research is to inform policy efforts to improve the quality, outcomes of care for vulnerable nursing home residents.
2013-2016	Investigator. Department of Veteran's Affairs, HSR&D Independent Investigator Research award, Cari Levy, MD, Ph.D. PI. "Evaluating Implementation of the Medical Foster Home Program." Quantitative and Qualitative evaluation of the impact of the new VA Geriatrics and Extended Care Medical Foster Home program where implemented across the country.
2013-2018	Principal Investigator. Department of Veteran's Affairs/Brown subcontract. The decision to hospitalize a Veteran from CLC is complicated and common and evidence suggests up to 40% are avoidable. We will introduce and test the effect of a staff training and quality improvement intervention designed to reduce hospital admissions in 8 randomly selected pairs of VAMC Community Living Centers. We expect to reduce hospitalizations by 20% without adverse consequences for Veterans.

1986-2018	Principal Investigator. AHRQ- NRSA T-32. Depart of Health and Human Services Grant # HS 00011-01-28 “National Research Service Award”. Program to train physicians and PhDs in research methodology, gerontology, geriatrics and long term care policy.
2013-2016	Principal Investigator, National Institute on Aging Grant # 5 R03 AG46482, “Advancing Long-Term Care Research by Linking HRS and LTC Focus”. This project will prepare a newly available database describing all US nursing homes and the long term care market in which they exist over the past decade for linkage with the Health and Retirement Study (HRS) making it possible to study how the market affects elders’ long term care choices.
2012-2016	Principal Investigator. USCF/ AHRQ subcontract. Northern California Institute of Research & Education. 5 R01 HL111032-03. Outcomes to beta blockers after myocardial infarction in nursing home residents. The proposed subcontract is to obtain permission Minimum Data Set, Medicare Enrollment Records, Medicare Part A claims and Medicare Part D files that match with the population of long stay nursing home residents.
2013-2016	PI of Subcontract/Mentor. NIA 1K23 AG045963-01. Patient-Centered Outcomes of Implantable Defibrillator Therapy in Older Patients. Implantable cardioverter-defibrillators (ICDs) are commonly inserted in older patients, yet the benefits to these patients remain unclear. This research will yield novel data about the clinical course, health care needs, and end-of-life experiences of older patients with ICDs.
2014-2016	Principal Investigator. Commonwealth Fund. The Impact of Provider Integration on Patients’ and Families’ Outcomes and Post-acute care experience. The overall goal of this project is to understand how patients and their families experience the transition from hospital to skilled nursing facilities (SNF) and whether their experience is mediated by the relationship the discharging hospital has with the receiving SNF (option 1).
2015-2016	Mentor. AHRQ 1R36HS023959–01 (Li). Impact of Pre-dialysis Quality of Care and Dialysis Coinsurance on Disenrollment of Patients with Incident End-stage Renal Disease from Medicare Advantage Plans and Subsequent Patient Outcomes. This study will assess the impact of pre-dialysis quality of care and dialysis coinsurance increase on end-stage renal disease (ESRD) patients’ disenrollment from MA plans and associated health outcomes. The study results will inform policymakers about optimal Medicare benefit and payment policies that reduce health expenditures and promote better health outcomes, while minimizing negative, unintended consequences for frail ESRD patients. Moreover, research findings will significantly contribute to enhancing risk mitigation strategies in the Affordable Care Act (ACA), which similarly provides a greater number and variety of plan choices to beneficiaries as a way of promoting market competition.
2015-2016	Mentor. AHRQ 1R36HS023961-01 (McHugh). The impact of Hospital-Skilled Nursing Facility Partnerships on Hospitalization Rates. The proposed research is relevant to public health because a more thorough understanding of organizational relationships and readmission reduction strategies can lead to improvements in the quality and safety of care transitions from hospitals to skilled nursing facilities. Thus, the proposed research is relevant to the elements

of AHRQ's mission pertaining to safety, quality and equity, by potentially providing insight to more efficient and viable ways in which hospitals can reduce readmissions.

2015-2017	Principal Investigator. Kimberly-Clark Corporation. Heroes in Prevention. The purpose of this project is to develop, implement and manage a controlled study in up to 5 Long-Term Care facilities (and up to 5 matched control facilities) of the impact of Heroes in Prevention on illness reduction and potential cost savings.
2013-2015	Co-Investigator. State of Rhode Island Department of Human Services AMQG 14/15-001 (Wilson). Measuring and Improving the Quality of Care in Rhode Island Medicaid. This contract will establish the strengths and weaknesses of deriving clinical quality measures for the Medicaid program directly from electronic medical records.
2014-2019	Co-Investigator. AHRQ 1R25HS023299-01. Researcher Training and Workforce Development in Methods and Standards for Conducting Patient Centered Outcomes. We propose an innovative program to teach CER/PCOR methods focused on systematic review, along with cutting-edge computational and information technology focused on producing, interpreting, and utilizing evidence about best healthcare practices, using a combination of didactic, asynchronous, peer, and experiential methods. Effort ended March 2015.
2014-2016	Co-Investigator. NIA Sub from University of Iowa P.O. No 1001319423 (Rahman). Understanding Racial and Geographic Disparities in Hospital-Based Observation Care. This study is to gain a better understanding of the cause and consequences of racial and geographic disparities in use of observation care among Medicare fee-for-service beneficiaries.
2014-2015	Principal Investigator. Pfizer, Inc. Pfizer Graduate Student Research Assistantship/Pre-doctoral Pharmacoepidemiology Fellowship.
