POSTGRADUATE TRAINING

- 1981 - 1989 Scientific work at the Institute of Molecular Biology and Biochemistry of the Free University of Berlin, Germany. Significant contribution in setting up the Laboratory for analysis of glycoproteins. Main contribution was introduction of high resolution analytical methods, such as high performance liquid chromatography (HPLC), capillary electrophoresis, 2D-electrophoresis and protein sequencing. Involved in education of undergraduate students (Medicine and Biochemistry) and doctor students as lecturer and mentor. Involved in several projects founded by German Ministry of Science and Technology (BMFT). Group leader for the project "Development of chromatographic supports for separation of biopolymers" in cooperation with the industry (company, Bischoff Analysentechnik, Leonberg, Germany).
- 1984 - 1985 Post-doctoral training at the National Institutes of Health, Bethesda, Maryland, USA in the group of Dr. Gilbert Ashwell and Dr. Richard Klausner. Main topic was the investigation of iron uptake in K 562 human erythroleukemia cells.

EXPERIENCE

- 1988 Senior Scientist.
The most important results of the scientific work in this period are development of the methods for separation and identification of hydrophobic membrane proteins. Different distribution pattern of proteins from the annexin family in rat liver und Morris hepatomas was shown. These differences are dependent of the malignancy of the tumor ("an early proteomic work")
- 1990 - 1991 Head of Research and Development in the company „Dr. Herbert Knauer“ Berlin, Germany

1991 - present	Head of Research and Development at OCTAPHARMA Pharmazeutika Produktionsges.m.b.H., Vienna, Austria Establishment of the research group and research laboratory in Vienna. Adaptation of work and organisation to new requirements for development of pharmaceuticals based on human plasma. Involved in development of several new products, such as new preparation of clotting factor VIII, clotting factor IX and antithrombin III. Application of high resolution methods for protein analysis, such as capillary electrophoresis, mass spectrometry, surface plasmon resonance etc. 1997 – founding of new research laboratory for analysis of plasma proteins in Berlin.
