CURRICULUM VITAE
LESLIE ANN DALINE BRICK

Assistant Professor
Department of Psychiatry and Human Behavior
Alpert Medical School of Brown University
Providence, RI
Office: (401) 444-1958
Email: leslie_brick@brown.edu

EDUCATION

Undergraduate	University of Colorado-Boulder, Psychology and Neuroscience, BS, 2009
Masters	University of Rhode Island, Psychology (Behavioral Science), MA, 2013
Doctoral	University of Rhode Island, Psychology (Behavioral Science), PhD, 2015
Other Advanced Degrees	University of Rhode Island, Neuroscience, Post-baccalaureate Certificate, 2015

POSTGRADUATE TRAINING

Fellowship	Alpert Brown Medical School of Brown University Fellowship in Developmental Psychopathology: Genetic/Epigenetic Influences, 2015-2016
Fellowship	Alpert Brown Medical School of Brown University T32 Research Fellowship in Child Mental Health, 2016-2017

HONORS AND AWARDS

2nd Place Best Postdoctoral Fellow Research, Mind Brain Research Day at Brown Medical School, 2016

3rd Place Golden Helix Inc. Annual Abstract Competition, 2016

Graduate Student Excellence in Behavioral Science Award, University of Rhode Island, 2015

Peter Merenda Prize in Statistics and Research Methodology, 2015

Graduate Student Association Travel Award, University of Rhode Island, 2015

Society of Multivariate Experimental Psychology (SMEP) Dissertation Research Grant, 2015

University of Rhode Island Graduate Fellowship, 2014-2015

Graduate Student Association Travel Award, University of Rhode Island, 2014

Society of Multivariate Experimental Psychology (SMEP) Student Travel Award, 2014

Society of Multivariate Experimental Psychology (SMEP) Student Travel Award, 2012

ACADEMIC APPOINTMENTS

Assistant Professor, Department of Psychiatry and Human Behavior, Alpert Warren Medical School of Brown University, 2017-present

Associate Director, Quantitative Sciences, Alpert Warren Medical School of Brown University, 2017-present

Adjunct Professor, Department of Psychology, Emory University, 2017-present

Instructor, University of Rhode Island, 2012

HOSPITAL APPOINTMENTS

Research Associate, Providence Veterans Affairs Medical Center, 2017-present

OTHER APPOINTMENTS

Ad-Hoc Reviewer, Translational Psychiatry, Addiction, Addictive Behaviors, Clinical Psychological Science, Biological Psychiatry, Psychological Methods, Psychiatric Genetics, Journal of Health Psychology, Journal of Physiology and Health, Journal of American College Health, Stress and Health, Tobacco Induced Disease

MEMBERSHIP IN SOCIETIES

International Society for Traumatic Stress Studies
Behavior Genetics Association
Research Society for Alcoholism
Society for Behavioral Medicine

| 2019-2021 | <p>Rhode Island Center for Clinical and Translational Science - Building an Infrastructure and Dynamic Dataset for AD Risk Assessment (Project PI: Brick, Leslie)
 U54-GM115677
 Project Primary Investigator
 This study leverages machine learning techniques to develop machine learning prediction algorithms for cognitive decline in Alzheimer’s Disease risk using novel biomarkers and large repository data.</p> |
| 2019-2021 | <p>Eating Related Self Regulation and Its Neural Substrates as Mechanisms Underlying the Sleep/Eating Behavior Association (PI: Goldschmidt, Andrea)</p> |

- R01 HL147914
Co-Investigator
The proposed mechanistic clinical trial aims to assess the effects of an experimental sleep manipulation on eating-related self-regulation and its neural substrates, and on real-world eating behavior, among children with overweight/obesity.
- 2018-2021 **Initiating and Maintaining Physical Activity in Depressed Individuals (MPI: Abrantes & Uebelacker)**
R01-HL127695
Co-Investigator
This proposed intervention study seeks to promote the adoption and maintenance of exercise behavior among persons with depression.
- 2018 **Modulating Impulsivity in Suicidal Adolescents With tDCS: A Proof of Concept Study (PI: Liu, Richard)**
R21-MH112055
Co-Investigator
This proof-of-concept study seeks to determine whether transcranial direct current stimulation (tDCS) may affect impulsive cognition and behavior in adolescent suicide attempters. The research involves a three-group randomized design, through specific neural pathways (the right inferior frontal gyrus in the case of behavioral impulsivity and the left orbitofrontal cortex in the case of cognitive impulsivity), as assessed with electroencephalography (EEG) and event-related potentials (ERPs).
- 2018-2019 **Life Stressors, Impulsivity, and Adolescent Behavior (PI: Liu, Richard)**
R01-MH101138
Co-Investigator
This observational study concerns risk for recurrence of suicide attempts among adolescents. The main questions concern how life stressors, different neurocognitive and/or neurobehavioral dimensions of impulsivity and loss-related experiences explain how past suicide attempts increase risk for future recurrences in a multiwave longitudinal study of 150 adolescent in-patients.
- 2018-2019 **Evaluation of the Coping Long Term with Active Suicide Program (PI Miller, Ivan)**
R01 MH101129
Co-Investigator
This project will evaluate an innovative intervention specifically designed to reduce suicidal behavior in a high risk group of suicidal inpatients.
- 2018-2019 **RCT of a tailored walking program to reduce stress among pregnant women (PI: Battle)**
R01 NR014540
Co-Investigator
The research involves a randomized controlled trial to contrast a prenatal walking program versus health education control among 152 pregnant women. Outcomes are depressive symptoms and maternal health and functioning, and infant neurobehavioral outcomes.

CURRENT:

- 2018-
2021 **Integrated Treatment Adherence Program for Bipolar Disorder at the Time of Prison Release (PI: Weinstock, Lauren)**
R34-MH117198
Co-Investigator
This proposal represents the first attempt to develop and pilot a targeted transitional interventional for BD among prisoners, laying the groundwork for a larger clinical trial (R01) to evaluate the effectiveness of CARE for improving clinical outcomes for this seriously ill, high risk, understudied population
- 2017-
2021 **Computer-Assisted Brief Intervention Protocol for Marijuana Using Juvenile Offenders (PI: Spirito, Anthony)**
R34-DA042247
Co-Investigator
This study will examine the feasibility of implementing one potential model for increasing access to substance use interventions in a juvenile justice setting by using: 1) a computer- assisted intervention addressing marijuana use for adolescents, and 2) a computer program on strategies to improve management of teens who misuse drugs for parents.
- 2018-
2021 **Efficacy of a Prenatal Yoga Intervention for Antenatal Depression (PI: Battle, Cynthia)**
R01 HD081868
Co-Investigator
This study will involve a randomized controlled trial to evaluate a gentle prenatal yoga class compared to a prenatal health education workshop in lowering depressive symptoms among pregnant women with antenatal depression.
- 2018-
2021 **Screening and Brief Intervention for Suicidality and Nonsuicidal Self-Injury Among Youth in the Juvenile Justice System (PI: Spirito, Anthony)**
R34-MH114307
Co-Investigator
This study will examine the feasibility and acceptability of a program designed to conduct safety planning with youth in the Juvenile Justice System who are at risk for a Suicide attempt and/or Self-Injury and to increase the possibility of them receiving outpatient mental health treatment
- 2018-
2021 **Predicting Suicide: A Longitudinal Analysis of Speech Patterns in a High Risk Sample (MPI: Schatten and Miller)**
R01-MH108610
Co-Investigator
The purpose of this project is to determine the utility of unstructured speech patterns to identify suicide risk derived from experiential measures (i.e., ecological momentary assessment) to predict suicide risk in the six-months following hospital discharge.
- 2018-
2021 **Reducing the Duration of Untreated Illness Among Youth in the Juvenile Justice System with Psychosis-Spectrum Disorders (PI: Spirito)**
R34-MH115457
Co-Investigator

This study will examine the feasibility of identifying youth in the Juvenile Justice System with thought disturbances and referring them to a specialized state program serving youth. We will train staff in ways to improve the chances that families will follow through with their referral for mental health care.

2018-
2022 **Brief Individual and Parent Interventions for Marijuana Misuse in Truant Adolescents (PI: Spirito, Anthony)**

R01-DA045396

Co-Investigator

The goal of this application is to find out if a Brief, motivation-building approach with parents and teens who have been involved in the juvenile justice system results in better outcomes for Marijuana use and truancy than standard educational information.

2018-
2022 **Risk Profiles and Mechanisms of Disease in Maltreated Children (PI: Tyrka)**

R01-HD086487

Co-Investigator

The goal of this observational study is to identify risk and protective profiles for the development of psychiatric and medical conditions in a high-risk sample of children. This involves a follow-up of a study of maltreated and non- maltreated preschool-age children 5 years later at age 8-10.

2016-
2021 **Predicting Suicide: A Longitudinal Analysis of Speech Patterns in a High Risk Sample (MPIs: Schatten, Heather & Miller, Ivan)**

R01-MH108610

Co-Investigator

This project is an observational study of unstructured speech patterns as a marker of suicide risk among discharged psychiatric patients.

2018-
2023 **Predicting Adult Outcomes in Bipolar Youth (PROBY) (PI: Yen, Shirley)**

R01-MH112543

Co-Investigator

The goal of PROBY is to examine what happens to youth with bipolar disorders (BP) once they become adults, including mood symptoms, suicidal behaviors, substance abuse, psychosocial and cognitive functioning, and cardiovascular illnesses.

2018-
2023 **Brain/behavior mechanisms of irritability and cognitive flexibility in children (PI: Dickstein, Daniel)**

R01-MH111542

Co-Investigator

The long-term goal of the proposed research is to improve the biological classification and treatment irritability in children. This application seeks to advance what is known about the brain and behavior relationships underlying cognitive flexibility and irritability in children. The research will be accomplished by studying 210 children who present to psychiatric services, enrolling them in a research study, which will involve brain scans (magnetic resonance imaging) and evaluation with psychological tests and measures.

- 2016-2022 **Risk Profiles and Mechanisms of Disease in Maltreated Children (PI: Tyrka, Audrey)**
R01-HD086487
Co-Investigator
The goal of this observational study is to identify risk and protective profiles for the development of psychiatric and medical conditions in a high-risk sample of children. This involves a follow-up of a study of maltreated and non- maltreated preschool-age children 5 years later at age 8-10.
- 2018-2023 **Non-Suicidal Self Injury in children: Brain/behavior alterations and risk for Suicidal Behavior (PI: Dickstein, Daniel)**
Co-Investigator
R01-MH110379
This is an observational study of neural signatures of adolescents with non-suicidal self-injury (NSSI). The goal is to compare adolescents with NSSI to controls without psychopathology, and to determine which neural alterations distinguish between NSSI-only youths who progress to further suicidal behavior including making their first suicide attempt vs. which remain engaged in NSSI-only; and to probe irritability, impulsive aggression, and social function as potential moderators of this trajectory.
- 2018-2024 **Comparison of Patient-Centered versus Provider-Centered Delivery of Cognitive Behavioral Treatment (CBT) for Pediatric Anxiety and Obsessive Compulsive Disorder (OCD) (PI: Freeman, Jennifer)**
PCORI
Co-Investigator
There is strong evidence that cognitive behavioral therapy (CBT) with exposure is the preferred treatment for youth with anxiety disorders, but outpatient services that provide this type of treatment are limited. The present 5-year study aims to compare the efficacy, efficiency, and feasibility of patient-centered, home-based CBT with a traditional office-based model of care.
- 2018-2021 **Integrating Computer-Assisted Parent Training Therapy into Community Mental Health Clinic Practice (PI: Wolff, Jennifer)**
R34-MH113598
Co-Investigator
The proposed study will evaluate a low cost, low intensity, technology based model for delivering parenting skills to parents of adolescents in a community mental health clinic.
- 2018-2021 **Reducing the Duration of Untreated Illness Among Youth in the Juvenile Justice System with Psychosis-Spectrum Disorders (PI: Spirito, Anthony)**
R34-MH115457
Co-Investigator
The goal of this application is to find out if a Brief, motivation-building approach with parents and teens who have been involved in the juvenile justice system results in better outcomes for Marijuana use and truancy than standard educational information.
- 2019-2021 **Treatment Development of Yoga for Anger Management in Incarcerated Adults (MPIs: Weinstock, Lauren & Uebelacker, Lisa)**

- R34 AT010172
Co-Investigator
This project proposed to develop and pilot a Hatha yoga intervention for dysregulated anger and reactive aggression in incarcerated adults.
- 2020-
2025 **Executive Functioning, Weight Trajectories, and Loss of Control Eating in Children with Overweight/Obesity: A Prospective Study (PI: Goldschmidt, Andrea)**
R01 DK120597
Co-Investigator
This study, which is the first to prospectively examine associations among general and food-specific EF, weight trajectories, and LOC eating, has clear potential to advance scientific and clinical understanding of mechanisms that promote the onset and maintenance of maladaptive eating in youth and inform interventions to alleviate their cumulative personal and societal burden.
- 2020-
2022 **Longitudinal Assessment of the Sleep-Suicide Link in Veterans Discharged from Inpatient Psychiatric Care (PIs: Primack, Jennifer & McGeary, John)**
VA 650D15016
Co-investigator
This goal of this study is to examine how sleep impacts suicide behaviors in Veterans recently discharged from inpatient psychiatric hospitalization by using a multimodal, longitudinal assessment of sleep, suicide behaviors, and related mechanisms in the 6-month period following psychiatric hospitalization.
- 2020-
2024 **Dynamic Impacts of Sleep Disruption on Ecologically Assessed Affective, Behavioral, and Cognitive Risk Factors for Suicide (PIs: Bozzay, Melanie & Armey, Michael)**
R01 MH124832
Co-investigator
The proposed study aims to characterize proximal risk for suicide using intensive longitudinal methods and to identify “windows” of greatest risk for suicide, which may vary from person to person, that serve as markers for intensive intervention.
- 2021-
2026 **Distinct Steroid Mechanisms in Menstrual Cycle Exacerbation of Psychopathology (PI: Peters, Jessica)**
R01MH126940
Co-investigator
The major goals of this project are to evaluate a novel theory of how changes in ovarian hormones differentially exacerbate psychopathology across the menstrual cycle, by examining links from hormones to behavioral mechanisms to symptoms in a sample of female individuals with borderline personality disorder symptoms.
