

Reid Franklin Cooper

Department of Earth, Environmental and Planetary Sciences
Brown University
Box 1846; 324 Brook Street
Providence, Rhode Island 02912 USA

Telephone: (401) 863-2160
FAX: (401) 863-2058
e-mail: reid_cooper@brown.edu
URL: <https://vivo.brown.edu/display/rcooper>

Research Interests: Experimental geophysics (seismic attenuation; transient and steady-state flow of minerals and rock); experimental petrology (structure and dynamics of silicate melts and glasses; phase equilibria; solid-state reactions; non-equilibrium thermodynamics); application of petrology/geochemistry to the design and analysis of engineering materials

Education:
Cornell University, Ithaca, New York
Ph.D. in Materials Science and Engineering – 1983
M.S. in Materials Science and Engineering – 1980
Minor Fields: Geophysics and Structural Geology/Tectonics

The George Washington University, Washington, D.C.
B.S. in Civil Engineering – 1977

Professional Experience:
Brown University, Providence, Rhode Island
2003-present Professor, Earth, Environmental and Planetary Sciences

University of Wisconsin–Madison
1994-2003 Professor, Materials Science and Engineering
Professor, Geology and Geophysics
1990-1994 Associate Professor, Materials Science and Engineering
Associate Professor, Geology and Geophysics.
1986-1990 Assistant Professor, Materials Science and Engineering.

California Institute of Technology, Pasadena California
Autumn 1994 Visiting Professor, Division of Geological and Planetary Sciences

Los Alamos National Laboratory, Los Alamos, New Mexico
1995 Visiting Scientist, Center for Materials Science

Corning Glass Works (now Corning, Inc.), Corning, New York
1983-1985 Senior Research Scientist, Research and Development Division,
Glass-Ceramics and Composites Research

Cornell University, Ithaca, New York
1977-1983 Graduate Research Assistant, Department of Materials Science and
Engineering

Teaching/
Education
Experience: 2003–
Brown University
Chemical and Mechanical Kinetics (Graduate level)
Thermodynamics/Phase Equilibria (Graduate level)
Mineralogy (Junior/Senior level)
Geochemistry/Earth Materials (Sophomore level)
Introductory Physical Geology (First-Year level)
Seminar on Thermodynamics & Natural Philosophy (Baccalaureate)
First-Year and Sophomore Advisor (2005–)
Ad hoc University Committee on Race/Gender Issues in Science
Education (2004–2005)
University Faculty Executive Committee (2010-2013); Officer (Past
Chair *pro tempore*, 2011-2012)
Brown University Community Council (2014–2017)
University Academic Priorities Committee (2018–2021)

<u>Teaching/ Education Experience:</u> (continued)	1986-2003	<u>University of Wisconsin-Madison</u> Introduction to Ceramic Materials (Senior/Graduate level) Materials Systems and Design Project (Senior level) Kinetics of Solid-State Reactions (Graduate level) Mechanical Behavior of Materials (Senior/Graduate level) Thermodynamics of Materials (Junior level) Baccalaureate Major Advisor, Materials Science/Metallurgy (1987-2003) College of Engineering Academic Programs, Curriculum and Regulations Committee (1988-1990) College of Engineering Committee on Education (1992-1997) College of Engineering Industrial Liaison Council (1998-2003) University Physical Sciences Divisional Executive Committee (1997-2000); Chair (1999-2000)
	1978 1977 (Summers)	Director, Camp Bowman, Goshen Scout Camps, Goshen, VA. National Capital Area Council, Boy Scouts of America. Total responsibility for operation and program of 250 boys/week summer camp. Hired, trained and supervised staff of 35 men and women for two nine-week seasons.
<u>Professional Societies and Activities:</u>	Member of: American Geophysical Union (Fellow); Mineralogical Society of America (Fellow); American Ceramic Society (Fellow); American Association for the Advancement of Science	
	<p>American Geophysical Union, Mineral and Rock Physics Focus Group Executive Committee, 2002-2019; Fellows Committee (Chair) 2009-2019; Secretary 2008-2013.</p> <p>Physical Properties of Earth Materials Committee, Chair, 2002-2004; Steering Committee/Membership Chair, 1991-1995.</p> <p>Associate Editor, <i>Journal of Geophysical Research–Solid Earth</i> 2007–2016.</p> <p>American Ceramic Society, ACerS/NIST Committee on Phase Equilibria Publications 2002-2006 (Chair, 2005-2006); Publications Committee, 2002-2006; Basic Science Division, Nominating Committee Chair, 1997.</p> <p>Associate Editor, <i>Journal of the American Ceramic Society</i>, 1999-2005</p> <p>Mineralogical Society of America, Nominating Committee, 1977; Benefactors Committee 1999–2007; Dana Medal Committee 2010-2014.</p> <p>Science Doctoral Programs External Review Committee, Tulane University, New Orleans, LA (2013)</p> <p>NSF Review Panels: SBIR, 1989; Mech. & Mat'l's., 1996; Ceramics, 1999, 2003;</p> <p>Graduate Research Fellowship Program (Geosciences), 2015-16, 2017-18, 2019-20.</p> <p>NASA Planetary Geosciences Review Panels (Geophysics): 1989-1991; 2017.</p> <p>Symposium Organizer:</p> <p><i>Workshop on the Status and Future of Experimental Rock Deformation</i>; Southern California Earthquake Center (sponsor), Summer 2004</p> <p><i>Structure and Dynamics of Silicate Melts and Glasses: Natural and Synthetic</i>; American Ceramic Society, Pacific Rim Conference, Autumn 2001.</p> <p><i>Chemical Processing of Electronic Ceramics</i>; Materials Research Society, Fall Meeting 1999.</p> <p><i>Experimental Techniques in Rock Mechanics</i>; 34th National Symposium on Rock Mechanics, Summer 1993.</p> <p><i>Mechanisms of Deformation and Failure in Rocks and Ceramics</i>; Materials Research Society, Spring Meeting 1993.</p> <p>Advisory Committee Member, Marsh Chapel, School of Theology, Boston University, 2019–2023.</p>	

Honors and Fellowships:

Brown University (2003-present)

President's Award for Excellence in Faculty Governance 2016
 Fellow, American Ceramic Society – elected 2014
 Fellow, American Geophysical Union – elected 2005
 Master of Arts *ad eundem gradum* 2004

University of Wisconsin–Madison (1986-2003)

Fellow, Mineralogical Society of America – elected 1996
 H.I. Romnes Faculty Research Fellowship – UW–Madison 1994-1999
 Presidential Young Investigator Award – National Science Foundation 1987-1992
 Polygon Engineering Council Outstanding Instructor Award – UW–Madison 1987,
 1993, 1994, 1997, 2002
 University of Wisconsin Regents Undergraduate Teaching Award 1992

Corning Glass Works (1983-1985)

Sigma Xi – elected 1985

Cornell University (1977-1983)

Corning Glass Works Foundation Fellowship 1978-79, 1979-80, 1980-81
 Tau Beta Pi (National Engineering Honor Society) National Fellowship 1977-78

The George Washington University (1973-1977)

Bachelor Degree conferred "With Distinction" (University Highest Honors)
 Tau Beta Pi Engineering Honor Society – Chapter President 1976-77 – elected 1976
 G.W. University Award in Materials Testing 1977
 American Society for Testing and Materials Student Award 1977
 American Society for Metals (D.C. Chapter) Student Research Award 1977
 American Society of Civil Engineers (Nat'l Capital Section) Student Award 1976

Funded Research (2018-2023):*Grain and Phase Boundaries in Mantle Assemblages: Atom Probe and Electron Microscopy/Diffraction Approaches*

National Science Foundation, Division of Earth Sciences, Program in Petrology and Geochemistry
(EAR-1947439)

R.F. Cooper, Principal Investigator; S.W. Parman, Co-Investigator
01/01/2020–12/31/2023; \$514,000

An experimental (rock-deformation), observational (natural olivine-basalt clots) and theoretical analysis of chemical segregation to grain and phase boundaries and the impact of boundary structure on composition profiles, employing specialized transmission electron microscopy and atom probe tomography.

Attenuation and Flow/Relaxation in Ice-I and its Effect on Thermochemical Evolution of the Icy Satellites
NASA Program in Solar Systems Workings

R.F. Cooper, Principal Investigator
09/01/2016–08/31/2023; \$360,597

An experimental and theoretical study of the effect(s) of persistent plastic deformation on the attenuation and transient creep responses in polycrystalline ice and ice/salt-hydrate aggregates.

Funded Research (2018-2023)(continued):*Transient Creep in Peridotite with Application to Postseismic Relaxation*

National Science Foundation, Division of Earth Sciences, Program in Geophysics (EAR-1620474)

R.F. Cooper, Principal Investigator

09/01/2016–08/31/2019; \$244,198

An experimental and theoretical study of transient flow in both constant stress (creep) and stress-relaxation modes, with application to upper mantle relaxation following earthquakes as measured by geodetic techniques.

Rock Weathering on Venus: Experimental Constraints on Products and Kinetics of Basalt-Atmosphere Interactions

NASA Program in Solar Systems Workings

A.H. Treiman, University Space Research Association–Houston, Principal Investigator; R.F. Cooper, Co-Investigator (one of six)

02/01/18–09/30/21; \$73,500 (Brown Univ. Subcontract)

An experimental and analytical study of the reaction thermodynamics and kinetics of basaltic (and analog) magmas with sulfur- and carbon-rich gasses.

Collaborative Research: Community Facility Support: Facilitating Access and Innovation through a Collaborative Organization for Rock Deformation (CORD)

National Science Foundation, Division of Earth Sciences, Program in Instrumentation and Facilities (EAR-1833496; EAR-2054439)

G. Hirth, Principal Investigator; R.F. Cooper and T. Tullis, Co-Investigators (Brown University)

M. Peč, Principal Investigator; J.B. Evans, Co-Investigator (Massachusetts Institute of Technology)

09/01/2018–08/31/2020; \$271,164; Renewed 07/01/2021–06/30/2024; \$175,626 (Brown University portion)

Support for two technician-educators—one at Brown, one at MIT—to facilitate rock deformation experimentation, particularly in training/support of laboratory visitors, in apparatus maintenance, and in laboratory collaboration.

Experimental Constraints on Surface Weathering on Venus

NASA Program in Solar Systems Workings (80NSSC23K0561)

M. McCanta, Univ. Tennessee-Knoxville, Principal Investigator; R.F. Cooper, Co-Investigator (one of six)

02/06/2023–02/05/2026; \$165,957 (Brown University portion)

An experimental, analytical and theoretical study of the reaction thermodynamics and kinetics of basaltic (and analog) magmas with high-pressure/-temperature sulfur- and carbon-rich gasses.
